Mood (mũd), *sb.* 2 [An alteration of *MODE sb.*, due to association with *MOOD sb.* 1]

1. *Logic.* (= *MODE sb.* 3 a.) Any one of the classes into which each of the four 'figures' (see *FIGURE sb.* 23) of valid categorical syllogisms is subdivided on the ground of the several ways in which syllogisms differ with regard to the quality and quantity of their constituent propositions.

The moods have mnemonic names (BARBARA, CELEARENT, etc.), in which the three vowels represent the quality and quantity of the three propositions: A=universal affirmative, E=universal negative, I=particular affirmative, O=particular negative. (Some of the consonants also have significant functions.) The number of recognized moods is 19, viz. four in the first figure, four in the second, six in the third, and five in the fourth.

A different, probably a historically older, sense of the word occurs in some writers (e.g. Aldrich and Whately) alongside the sense above explained, and without being expressly distinguished from it. In this sense the mood of a syllogism is the type of structure to which it belongs in respect of quality and quantity alone, without regard to the figure; so that, e.g. Celarent in the first figure and Cesare in the second would be not two moods but two varieties of the same mood. (See quot. 1006, where this sense is definitely adopted to the exclusion of the other.)

[1532: see *MODE sb.* 3 a.] 1569 J. SANFORD tr. *Agrippa's Van. Arts* 21 b. A Syllogisme... which ought to be in one of the xix. Moods. 1589 *Marple. Epit.* E iv b. Prot.* i. iii. § 29. 142 In what mood or figure, would this conclusion follow out of these Premises? 1870 *Jevons Elem. Logic* xvi. 136 We call each of these triplets of propositions a mood or form of the syllogism. 1884 tr. *Lotze's Logic* 88 The above rule, which, where both

premises are affirmative, requires one to be universal, prescribes a particular affirmative conclusion, and admits the moods *Darapti*, *Datisi*, and *Disamis*. 1906 *Josens Logic* xii. 240 The difference of mood depends on the quantity and quality of the propositions composing the syllogism. 'This may be the same in different figures, or different in the same figure... The different moods have received distinct names in the various figures wherein they occur; and hence what are called the 'mood-names'... indicate both figure and mood.

2. *Gram.* Any one of the several groups of forms in the conjugation of a verb which serve to indicate the function in which the verb is used, i.e. whether it expresses a predication, a command, a wish, or the like; that quality of a verb which depends on the question to which of these groups its form belongs.

(Sw. *māne*, Da. *maane*). Goth. *māno* masc. —OTeut. **mānon*—

According to Brugmann this form has arisen by substitution of suffix, from the i-stem **mānōp*-MONTH, as OTeut. **nepōn*-NEPHEW from Indogermanic **nepōs*- (cf. L. *nepōs*-

eml. Cognate words for 'moon' and 'month' are found in all branches of the Indogermanic family; outside Teut. the following types occur: **mēnā* (Gr. *μήνη* moon), **mēnon-* (Lith. *mėnuo* moon), **mēnē-s*, -os (Lith. *mėnė*, dial. *mėnė*, month), and with reduced grade of stem-suffix **mēns* (Skr. *mānā*, Zend *mānā*, Osl. *mēst*, month, month, Gr. *μήν*, Ion. *μῆν*, L. *mēnsis*, Irish *mē*, month). The prevailing view that the root is **mē-*, to measure (the moon having, it is supposed, been named from its function as a measurer of time) is plausible, but cannot be considered certainly true.

1. The satellite of the earth; a secondary planet, whose light, derived from the sun, is reflected to the earth and serves to dispel the darkness of night.

The moon's constantly recurring changes and phases (see 1c and NEW MOON, FULL MOON, HALF-MOON, HARVEST MOON, and cf. CRESCENT, QUARTER) have caused it to be taken as a common type of changeableness or fickleness. They are popularly supposed to influence the health of body and mind, and to cause lunacy (cf. LUNATIC). The moon's appearance to the eye of being diversified with light and dark patches gave rise to the fanciful comparison of its disc to a man's face (see 1f and MAN-IN-THE-MOON). It has been worshipped as a deity by many races; in classical mythology it was identified with various goddesses (see 1b). Its white or silvery light is taken as emblematic of coldness or ebastity.

The moon's attraction is the chief cause of the tides. The period in which the moon completes her series of changes, or in which her orbital revolution brings her back to the same apparent position with regard to the sun, is called a month; in astronomical use this term is applied in a wider sense (see MONTH sb. 2a).

b. Since the disappearance of the grammatical genders of OE., in which *mōna* was masc., the feminine pronoun has commonly been used in referring to the moon, even when no personification is intended (the neuter pronoun occurs, but less frequently); in poetry the moon is often personified, always as a female, and sometimes, after classical example, identified with various goddesses, as Cynthia, Diana, Phoebe.

ON. had *mōr* in the same sense; but this must be wholly unconnected, unless the -ro of OTeut. **mōro-* be a suffix, the pre-Teut. root being **mōr* (cf. *mōr*, as possibly in **mā-rī* Meaz sb.). Most scholars, however, regard the *r* as belonging to the root, which they consider to be an ablaut variant of **mūr-*, *mōr-* to die, so that the primitive sense of the sb. would be 'dead' or 'barren land.'

Moors (mūor, mōor), sb. 2 Forms: 4 *Maur*, 4-7 *More*, 5 *Moure*, *Mowre*, 6, 8 *Maure*, 6-7 *Moore*, 7-*Moors*. (Now with initial capital.) [ME. *More*, a. F. *Mor* (13th c.), *Maure*, ad. The L. *Maurus*, Gr. *Mōpous* may possibly be from some ancient North African language. Some believe the word to be merely a use of Gr. *μαύρος* black (which on this view is apocryphal from *μαῦρος* blind); but this adj. (or at least this sense of it) is confined to late Gr., and may even be derived from the ethnic name.

1. In *Ancient History*, a native of *Mauretania*, a region of Northern Africa corresponding to parts of Morocco and Algeria. In later times, one belonging to the people of mixed Berber and Arab race, Mohammedan in religion, who constitute the bulk of the population of North-western Africa, and who in the 8th c. conquered Spain. In the Middle Ages, and as late as the 17th c., the Moors were commonly supposed to be mostly black or very swarthy (though the existence of 'white Moors' was recognized), and hence the word was often used for 'negro'; cf. *BLACK-MOOR*.

On the assumption that *mappe* is ad. L. *mapula* (dim. of *mapa* napkin) which may in monastic Latin have been used for 'mop', it would be possible that *mappe* is similarly a direct adoption of L. *mapa*. The ordinary hypothesis that the word is a. Cf., however, mod. Walloon *map* table-cloth, *mappe* napkin (Remacle).

The form mop first appears in the 17th c. (cf. however MOPPET¹, which is recorded much earlier), and may have been due to association with Mop sb.¹ in the sense of 'rag doll'. The W. Flem. *moppe*, a ship's mop (De Bo), may possibly be adopted from Eng.]

No. 62. 3 It is an ancient custom.. for servants out of place to assemble once a year, in or near some great town, for the purpose of being hired. I have heard my mother say, that formerly each person carried a mop, or a broom, or flail, or some other badge denoting the office in which they desired to engage; but this was done away with before my time. In this assemblage, which is called a mop, persons in want of servants generally make their choice. 1859 *All Year Round* No. 29. 52 The provincial policeman had said that it was the Mop, or, as the officer pronounced it, the Mope-day. 1870 *3rd Rep. b. qualifying an adj. or advb., to form the comparative.

With most adjs. and advs. of more than one syllable, and with all of more than two syllables, this is the normal mode of forming the comparative. A few monosyllables (e.g. *right*, *just*) normally form their comparatives in this way instead of taking the suffix -er.

c 1175 *Lamb. Hom.* 5 Þe we ahte to beon þe eodmodde and þa mare imete. 1340 *HAMPOLE Pr. Cons.* 858 And what es mar horibel in stede þan a man es when he es dede? 1375 *BARBOUR Bruce* vii. 555 He beheld hir mayr ynkyrl. 1711 *STEELE Spect.* No. 6 7 2 He finds Rest more agreeable than Motion. 1788 Mrs. HUGHES *Henry & Isabella*

c. Often prefixed to monosyllabic and disyllabic adjs. and advs. which have otherwise a regular comparative in -er; as *more true*, *more busy*, *more often* = *truer*, *busier*, *oftener*.

By mod. writers this alternative form is used (1) for special emphasis or clearness; (2) to preserve a balance of phrase when other comparatives with 'more' occur in the context; (3) to qualify the whole predicate rather than the single adj. or advb.

c 1330 R. BRUNNE *Chron.* (1860) 235 Was neuer at Saynt Denys feste holden more hy. 1340 *Ayenh.* 63 Ac þe leas-inges likide hyeþ more grat zenne. c 1400 *MAUNDEV* (1839) xxx. 305 He rennethe more faste than ony of the tother. 1470-85 *MALOR Arthur* vii. vii. 222, I am a gentyl man borne and of more hyghe lygnage than thou. 1597 *HOOKEE Ecd. 5. Expressions in which *more* (in sense B. 2) is followed by *than* with a designation of number or quantity admit of being used instrumentally or adverbially, as in 'more than ten years old'. The analogy of these has given rise to expressions like 'more than once' (a multiplicative corresponding to the quasi-numeral 'more than one'). Hence, from the 16th c. onwards, *more than* has been placed

before adjs., advs., vbs., and descriptive sbs., to indicate that the word thus qualified is (in some obvious respect) inadequate to the intended meaning.

Cf. the similar uses of *plus* *quant* in Latin.

More, var. MOHUR; obs. f. MOOR.

-*more* (mōr), *suffix*, forming advs. of place (rarely of time) in the comparative degree (most) of which have given rise to adjs. of identical form). Chiefly appended to advs. having already the comparative ending -er, as in *backermore, downermore, farthermore, furthermore, hindermore, innermore, outermore, overmore, rathermore, uttermore*; in the 16-17th c. a few formations occur in which it is added to a positive or uncomparative adv., as *hindmore, hithermore, innmore, Sc. yonder mair*.

The suffix is identical with *MORE* *adv.*; the addition of this adv. to comparatives occurs in Scandinavian, as ON. *fyrreir* earlier, *firreir* farther off, *nærreir* nearer, OSW. *innärmer* = INNERMORE, *nithärmer* = NETHERMORE. The earliest instances in Eng. occur in the *Ormulum* (*furthermore*) and the *Cursor Mundi* (*farthermore, innermore*); it is therefore likely that the use was originally due to Scandinavian influence. But the majority of the comparatives in -more were formed to correspond to previously existing superlatives in -most, which were partly altered forms of OE. superlatives in -*most*, and partly new formations on the analogy of these.

Morganatic (mōrgān'atik), a. [ad. mod.L. *morganaticus* (whence G. *morganatisch*, F. *morganatique*, It. *morganatico*, etc.) evolved from the med.L. phrase *matrimonium ad morganaticam*, where the last word is prob. synonymous with

morganaticum MORNING-GIFT, f. OHG. *morgan* (= MORN) in **morganeba* morning-gift (*morgane-giba* in Gregory of Tours, 6th c.; MHG. *morgen-gabe*). The literal meaning of the term 'morganatic marriage' (*matrimonium ad morganaticam*) is, as is explained in a 16th c. passage quoted by Du Cange, a marriage by which the wife and the children that may be born are entitled to no share in the husband's possessions beyond the 'morning-gift.' The distinctive epithet of that kind of marriage by which a man of exalted rank takes to wife a woman of lower station, with the provision that she remains in her former rank, and that the issue of the marriage have no claim to succeed to the possessions or dignities of their father; also, occasionally, used to designate the marriage, under similar conditions, of a woman of exalted rank to a man of inferior station. Hence *morganatic husband*, *wife*.

A morganatic marriage is sometimes called a 'left-handed marriage' (G. *Ehe zur linken hand*), because in the ceremony the bridegroom gave the bride his left hand instead of his right. The latter term is sometimes used in a wider sense, for the *matrimonium inaequale* of German law, in which, though the spouse of inferior rank was not elevated, the children retained the rights of succession.

Mormon (mōr'mon). [f. *Mormon*, the name of the pretended author of 'The Book of Mormon': see below. The earlier name was MORMONITE.]

1. A member or adherent of a religious body, calling itself 'The Church of Jesus Christ of the Latter-day Saints', founded in 1830 at Manchester, New York, by Joseph Smith, on the basis of alleged Divine revelations contained in the 'Book of Mormon', which Smith professed to have translated by special inspiration from the original written on gold plates, miraculously discovered by himself. The feature of the sect which is popularly best known, and which is referred to in allusive uses of the name, is the practice of polygamy: but this is not countenanced by the Book of Mormon, and is now understood to have been abandoned in obedience to the law of the United States. 1842 CASWALL *City of Mormons* 34, I begged him to inform me whether the Mormons believed in the Trinity. 1845 G. See also MORROW. [Com. Tent.: the OE. forms represent three distinct types, each of which is represented in one or more of the other Teut. langs. (1) OE. *morgen* (inflected also *mörzn-, mörpn-*) = OFris. **morgen*, *mörn*, OS. *morgan* (MLG., MDn., Du. *morgen*), OHG. *morgan* (MHG., mod.G.

morgen):-Otent. **murgano*-2, represented also, with variation of suffix, by ON. *morgunni*, -*onni* (Sw. *morgon*, Da. *morgen*). (2) OE. *myrgeu*- (in the comb. *myrgeuic*) = ON. *myrgum*, Goth. *maurgin*-s:-Otent. **murgino*-2. (3) OE. *margen*, *mergen* = MDn. *margen*, *mergen*, ON. *marginn* (OSw. *marghan*):-Otent. **margano*-2, -*ino*-2. The word in all forms retains the masculine gender.

The affinities outside Teut. are doubtful. Some refer the word to the pre-Teut. root **merk-* to be dark; but the absence of consonant-ablaut, as well as the inappropriateness of the sense, seems to render this view less probable than the alternative hypothesis that the root is **merg-*, represented by Lith. *mirgu* to twinkle, *margas* parti-coloured. The present monosyllabic form descends, partly at least, from the OE. contraction in oblique cases, *morne*, *mornes* for *morgene*, *morgenes*. (The same contraction existed in ON.) But it may also in part represent the result of a process of contraction starting from ME. *mornen*, the intermediate forms being *mornun*, *mornen*, etc.

The ME. forms that retain the final *n* are for convenience placed here, though many of them might with equal propriety be referred to *Morrow*. In MSS. it is often doubtful whether the word is *morn* or *mornu* = 'morrow'.

The notion that the morbid matter of glands came from the spine was generally held. The 16th c. Mortmain (mɔˈtmɛn), *sb. Law.* Forms: 5-6 mortmayn(e), mortemayn(e), 6 mortemeyn, mortmayne, 6-8 mortmaine, 6- mortmain. [a. It seems probable that 'dead hand' in English legal use is a metaphorical expression for impersonal ownership, and is unconnected with the older feudal use of *manus mortua* to denote the custom by which serfs and other classes included under the term *homines manus mortue* had no power of testamentary disposition, their possessions, if they died without legitimate offspring, reverting to the lord.]

The condition of lands or tenements held inalienably by an ecclesiastical or other corporation. Also *attrib.*

Alienations in mortmain, as being injurious to the rights of the crown and the mesne lords, were forbidden by 7 Edw. I, st. 2 (see quot. 1279) and many subsequent Acts, known as the 'Statutes of Mortmain'. The intention of these statutes was to a great extent evaded by judicial interpretations. *The Mortmain Act*: the statute 9 Geo. Mosquo, -quy, obs. forms of MOSQUE.

Moss (mɒs), *sb.* 1. Forms: 1, 3, 6 mos, 2, 6 mosse, 4-6 mosse, 5 moos, mosh, 4- moss. [OE. *mos* neut., bog (also 12th c. *moose* moss), corresponding to MDa. MLG. *mos* bog, also moss, lichen, mildew (Du. *mos* moss), OHG. MHG. *mos* (mod. G. *moos*) bog, moss, MSw. Da. *mos*: -OTeut. **muso*†; declensional variants are represented by Flemish *moze* mud, ON. *mose* wk. masc., bog, moss, Sw. *moose* masc., bog, *moosa* fem., moss. From a different ablativ-grade of the same root (OTeut. **meus*, -meuz-) are OE. *meos* (? masc.) moss (see MESE *sb.*), OHG. *meos* masc., moss (mod. G. *mies* masc., neut., moss, lichen; in some dialects bog), ON. *mýr-r* MIRE *sb.* Cognates outside Teut. (f. Indogermanic **mus-*) are L. *musculus* moss, OSL. *múllit* moss, ? Lith. *musai* scum on sour milk. The Fr. *mousse* fem. (Pr. *moosa*), moss, is prob. of Teut. origin.

All branches of Teut. exc. Gothic have the word or its cognates in both the senses 'bog' and 'moss' (the plant). As moss is the characteristic plant of bogs, there is no reason for doubting the identity of the word in the two senses. Which is the prior sense is doubtful; the fact that the cognates outside Teut. have the sense 'moss' only is not decisive. The sense 'bog' is the only one known in OE.; but the use as the name of the plant (called in OE. *meos*) presumably existed in OE., as a late adoption from continental Teut. would be very improbable. The 12th c. northern form *mose* (sense 3, quot. c. 1150) is perh. adopted from ON.; it cannot be the ancestor of the mod. form with unvoiced (s).]

The OE. *māst*, the normal representative of the Com. Teut. type, has been found only in Northumbrian, but it is not certain that it existed only in that dialect. The ordinary OE. form (WS. *mæst*, Kentish *mēst*) has abnormal umlaut, and seems to descend from a prehistoric **māst*, a reformation due to a consciousness of the grammatical relation of the word to *mā*. The umlaut form survived, in the south, down to the 15th c., but seems to have now entirely disappeared even in dialects. (The 19th c. northern form *mæst* represents OE. *māst*; the coincidence with the early ME. *mæst* - OE. *māst* is accidental.) The establishment of *most* as the only form in the midlands and south was probably due to the influence of the related *mo*, *more*.

The southern form *moost*, occasionally spelt *moos*, was often used, esp. in times, by the Sc. poets of the 15-16th c.]

Most, obs. form of MUST sb. and v.

-most (məst, mōst, mēst), suffix, forming adjs. in the superlative degree (many of which are also used as advs.), is an altered form of OE. *-mest* (= Goth. *-umist*), a combination of two distinct OTeut. (and Indogermanic) superlative suffixes, *-mo-* (which occurs, e.g., in OE. *forma* first, *hindema* last, and in L. *primus* first), and *-isto-* *-est*. Those OE. superlatives in *-mest* which either descend from OTeut., or are extensions of OTeut. superlatives in *-mo-*, are formed not on adjs. but on prepositional or demonstrative stems; examples are *astemest* (see AFTERMOST), *formest* or *fyrrest* FOREMOST, *inmost*, *nidemest* lowest, *yfemest* or *yfemest* (see OVEEMEST), *itmost* or *ytmost* UTMOST, *ymest* (= Goth. *auhumists*) highest; the only instance (among the words belonging to this primary group) of formation on an adj.-stem is *midmost* MIDMOST. On the analogy of these older words, the suffix *-mest* was in OE. used to form superlatives of several adjs. of local and temporal signification, as *helmost*, *sidenest* latest, *eastmost*, *westmost* (also *westema*), *nordmost*, *sidenest*.

In late OE. the adjs. in *-mest* came to be regarded as compounds of *mest* MOST, as the frequent spelling *-mest* shows. The subsequent history of the written form of the suffix coincides with that of the adj., exc. that the absence of stress led to the occasional retention of the spelling *-mest* (beside the quasi-etymological *-most*) down to the 16th c. In mod. English the formal pronunciation of the suffix is assimilated to that of the adj., though colloq. the normal pronunciation (məst) is usual.

As the superlatives in *-mest*, *-most* corresponded to comparatives in *-er*, analogy led to the insertion of *r* or *er* before the suffix: thus *astemest* was in early ME. altered to *aftermost*, and *ouemest* was replaced by *overmost*. In the 15th and 16th c. the suffix *-most* (interpreted as identical with MOST *a*.) was added to many comparatives in *-er*, on the analogy of earlier adverbial formations in *-MORE*, as in *furthermost*, *hindermost*, *innermost*, *lowermost*, *outermost*, *uppermost*, *uttermost*.

In ME. and modern English, the suffix has been appended to certain positive adjs.; to shs. used adjectively, as in *backmost*, *bottommost*, *topmost*; and to advs., as in *downmost*, *upmost*, *hithermost*.

The restriction of the application of the suffix to words denoting position in place, time, or serial order, which existed in OE., has almost universally been adhered to in the subsequent formations; the only exception, in a word that has obtained any degree of currency, is *bettermost*. The only other violations of the rule occur in mere nonce-words, as in the following quot.

WG. and Gothic preterite-present verb (wanting in Scandinavian): OE. *mōt* corresp. to OFris. *mōt*, OS. *mōt*, *muot* may, must (Du. *moet* must), OHG., MHG. *muoz* may, must (mod. G. *muß* must), Goth. *ga-mōt* (it) has room, related to OHG. *muozga* (mod. G. *muße*) leisure — OTeut. type **mōtā*.

The primary sense seems to be that preserved in Gothic, from which the sense 'is permitted, may' can easily have been developed. The transition from this to the sense 'is obliged, must' is more difficult to explain; it may have arisen from the use in negative contexts, where the two senses ('may not', 'must not') are nearly coincident. Normally, OTeut. **mōt* should be the perfect of a verb **mat*, but there is no trace of a vb. of this form with a suitable sense; the word may be related to **met* to measure (see *MEtz* v.).

If the verb had come down to mod. English, its form would have been *moet*. Exc. in northern dialects, it seems not to have survived in colloquial use beyond the 15th c., or at latest the middle of the 16th c. In the 16th c. it was often confused with *mought* (see *MAY* v.), with which it was prob. identical in sound. In the early part of the 16th c., the verb was still used correctly as a present tense, though commonly misspelt *mought*. In the archaic use of Spenser and later writers, on the other hand, it is, even when written *mote*, almost always a preterite except in traditional phrases.

The pa. t. (OE. *mōste*) is treated under *MUST*. The survival of the inflected and person (OE. *mōst*) is doubtful after the early part of the 15th c., on account of its formal coincidence with the pa. t., which by that time had already assumed the function of a present.]

motte *fem.* (?from *LG.*), *ON. motte* *wk. masc.*

(*Sw. Norw. mott* maggot, weevil).

The phonology is obscure. The word has usually been supposed to be cogn. w. OE. *maða* maggot (see **MATHIE**), which is plausible as regards the sense; but the OE. form *mohðe* points rather to the Teut. root **mug-* as in **MIDGE**.]

1. A small nocturnal lepidopterous insect of the genus *Tinea*, which breeds in cloth, furs, etc., on which its larva feeds; a clothes-moth. In early use, the name seems to have been applied rather to the larva than to the insect itself. From the 16th c. it has been taken to denote primarily the insect in its winged state, and applied to any nocturnal lepidopterous insect of similar appearance.

† *False moth* (*tr. mod. L. pseudo-tinea*, Réaumur): an insect closely resembling the clothes-moth, but feeding on leaves.

As in the case of *FATHER*, the substitution of *th* for the earlier *d* dates from the beginning of the 16th c., though the pronunciation with (*ð*) probably existed earlier. The occasional occurrence of the spelling *mōther* in the 14th c. (e.g. in the Göttingen MS. of the *Cursor Mundi*) has prob. no phonetic significance, being due to association with words like *brother*, *other*, which in fact occur in the immediate context of several of the examples. The development of OE. *ð* to mod.E. *th* (through *ð, ð, u, u*) is normal in the case of words in *-ther, -der*: cf. *brother, other, ruler*. In OE. the genitive sing. normally coincided in form with the nom., and many instances of the uninflected genitive occur in ME. and early mod.E. (see also 15 b). The genitive *mother's* is common in the Northumbrian gospels (10th c.).

1. A female parent; a woman who has given birth to a child. Correlative with *son* or *daughter*.

As with other terms of relationship, *my* is (exc. in poetic language) commonly omitted before *mother* used vocatively. On the other hand, in the 3rd person the use of *mother* for *my mother* is colloquial and familiar; in the middle of the 19th c. it was regarded as vulgar, or at least as unfashionable, but has now regained currency.

Mother (mʌðə), sb. 2. [Corresponds in meaning to MDu. *moeder*, moer (in mod.Du. *moer*), G. *mutter*, identical in form and gender with the equivalent of MOTHER sb. 1.]

Comparison with the synonymous It., Sp. *madre* scum of liquids, F. *mère* (de vinaigre), OF. *mere* 'vendange pressée' (=sense 3 below), seems to show that this word, in Eng., Du., and Ger., is really an application of MOTHER sb. 1. The transition of sense is difficult to explain; but most probably the scum or dregs of distilled waters and the like was regarded as being a portion of the 'mother' or original crude substance which had remained mixed with the refined product, from which in course of time it separated itself. (The term may possibly have belonged originally to the vocabulary of alchemy.) An explanation sometimes given, that 'mother of vinegar' was so called on account of its effect in promoting acetous fermentation, does not agree with the history of the use. It has been pointed out that Gr. *μηρ*, old woman, is used in the sense 'scum, as of boiled milk', but the coincidence is prob. accidental.

Most etymologists have regarded the word (with its Du. and Ger. equivalents) as altered by popular etymology from Du. *moeder* masc., mud, mire (for which Middle Du. has a rare variant *moeder*, occurring chiefly in derivatives) = LG. *moeder*, mother (whence mod.G. *moder*), HG. dial. *mutter* masc. (for which a variant *mutter* occurs). This notion goes back to Kilian's (Du. or Flemish) dictionary of 1598, which contains the two following entries: (1) *Moeder*, *moyer*, *moyre*, *moer*, limus, conum mollius, lutum, volutabrum; Ang. *niere*, *nudde*; and (2) *Moeder*, *moyer*, *moeder*, *grondspeer*, fax, faxes, crassamen, crassamentum; Ang. *mother*. But there appears to be no evidence that the form *moeder* was ever used for 'mother' or 'scum', nor is that sense recorded for Ger. dial. *mutter*.

Motled, obs. form of MOTILED.

Motley (mptli), a. (adv.), sb. Forms: 4 motteley, 4-5 motteley, 4-6 smotly, 5 motle, 6 motele, motlaye, 6-7 moatl(e)y, (7 motly), 7-8 motely, 5- motley. [Of obscure origin.

The early forms (with which cf. those of MEOLEY) suggest adoption of an AF. **motell*, which may possibly have been formed on the native Eng. *Mote* sb., speck, spot; cf. *speckled*, with which in some early examples *motley* seems nearly synonymous. Formally the word might be derived from OF. *motele*, early mod. F. *motteau* little clod, also 'clot of congealed moisture' (Cotgr.), discol. of *mote*, *motte* clod, but this does not seem quite satisfactory with regard to sense. Connection with early mod. F. *matell* 'clotted, knotted, curdled, or curd-like' (Cotgr.) is improbable on grounds both of form and meaning.]

† In the following quot. it is doubtful whether *mounde* is this word in the concrete sense 'force', or whether, as the

Fr. phrase in the context suggests, it is the F. *moude* Mound sb.1 in the sense 'number of people'.

c 1305 *Pol. Songs* (Camden) 189 He went toward Bruges þas þur þas, with swithe gret mounde.

Mound (mound), sb.3 Also 6 mownde, 7 mounde. [Of obscure origin; the related MOUND v. occurs earlier in our quot., and may possibly be the source of the sb.]

The sb. has commonly been supposed to represent the OE. *mund* (cf. *MOUND sb.1*); but that word means not 'defence', but 'guardianship, tutelage' (of persons). The OE. *mundþeowas* (rendering *L. montes* in Ps. cxviii. 3), which has been appealed to to show that *mound* might have the sense of material defence or protection, is prob. a mistake for a tautologous *'mundþeowas'*.

Sense 2 appears to have arisen from the modification of the original sense 'fence' by association with MOUNT sb.1; the same influence afterwards produced the now prevailing sense 'tumulus', which first occurs in the 18th c.]

2. As a prefixed title. Now pronounced (mɪstə), or with entire absence of stress (mɪstə, mɪstə). The want of a plural form is supplied by *Messrs.*, *MESSIEURS* 2.

Until the latter half of the 17th c. the title was often written in the full form *master*; but there is reason for believing that from the 16th c. it was, at least in rapid or careless speech, treated proclitically, with consequent alteration of the vowel of the first syllable. (See *MISTEX* sb.², quot. 1551.) Eventually the word came to have the weakened pronunciation whenever it was used as a prefixed title, and it became customary to employ the abbreviated spelling always for this use, and for this only. Hence at the beginning of the 18th c. *master* and *Mr.* were already regarded as distinct words. Cf. *MISTER* sb.², which is merely an occasional (chiefly jocular) rendering of the pronunciation of the word of which 'Mr.' is the accepted spelling.

The early history of the application of *Mr.* is identical with that of the use of its fuller form: see *MASTER* sb. 21. From the 17th c. it has been the customary ceremonious prefix to the name of any man below the rank of knight and above some humble but undefined level of social status, except where usage requires the substitution of some honorific title, such, for instance, as those denoting military and naval rank. As with other titles of courtesy, the inferior limit for its application has been continually lowered; at the present day any man however low in station would be styled 'Mr.' on certain occasions, e.g. in the address of a letter. Modern custom forbids the use of the prefix when *Esquire* is appended to the name, and it is now omitted after 'The Hon.' and 'The Rev.' (though some still write 'the Rev. Mr. A.' when

the Christian name happens to be unknown); but in other than ceremonious use 'Mr.' is substituted for these titles.

The use of *Mr.* before a prefixed title of office is nearly obsolete. The Judges of the Supreme Court are still styled 'Mr. Justice A.'; the designations 'Mr. Baron A.', 'Mr. Sergeant B.', belonged to dignities now abolished. In municipal use we still occasionally read of 'Mr. Alderman A.', 'Mr. Deputy B.', 'Mr. Councillor C.'

Before an official title not followed by the name, the prefix *Mr.* is still common, as in 'Mr. Chairman', 'Mr. Editor', 'Mr. President', 'Mr. Mayor'. These are now used only vocatively; 'Mr. Speaker' is used also in the 3rd person.

2. As a prefixed title of courtesy. Now pronounced (mɪsɪs, mɪsɪz).

In the latter half of the 17th c. there was a general tendency to confine the use of written abbreviations to words of inferior substantial importance, such as prefixed titles. The form *Mrs.* for *mistress* therefore fell into disuse except when prefixed to a name; and in this position the writing of the full form gradually became unusual. The contracted pronunciation, which in other applications of the word has never been more than a vulgarism (see *MISSIS*), became, for the prefixed title, first a permitted colloquial licence, and ultimately the only allowable pronunciation. When this stage was reached, *Mrs.* (with the contracted pronunciation) became a distinct word from *mistress*. As to the chronology of these changes evidence is wanting; but it may be noted that Walker 1828 says that *mistress* as a title of civility is pronounced *missis*, and that 'to pronounce the word as it is written would, in these cases, appear quaint and pedantic'.

a. Prefixed to the surname of a married woman (sometimes with her Christian name or that of her husband intervening).

Originally distinctive of gentlewomen, the use of the prefix has gradually extended downwards; at the present time, every married woman who has no superior title is styled 'Mrs.' even though her husband is of so humble a position as not ordinarily to be referred to as 'Mr.'. In British use the insertion of a woman's Christian name after *Mrs.* (as 'Mrs. Mary Smith') is rare exc. in legal documents, cheques, or the like, the normal practice when distinction is needed being to insert the husband's name (as 'Mrs. John Smith'). In the U.S. both these modes of designation are in general use.

Mule (mūl). Also 1 mūl, 4 moul, mule, 4-5 muley, 5 moule, mewle, (*pl.* moylez), 5-9 (9 *arch.*) moyle, 6 moole, muill, mull, 6-7 moile, 6-8 moil, moyl. [The OE. *mūl* masc., *ad.* L. *mūlus* was, in early ME. superseded by the

adoption of the OF. *mul* masc., *mule* fem. (mod. F. *mulo* fem.; for the masc. the dim. *mulet* is used) = Sp., Pg., It. *mulo* masc., *mula* fem. = L. *mulus* masc., *mula* fem.

The L. *mulus* was adopted at an early period into most of the Teut. langs.: MLG., OHG. (MHG.) *mūt*, MDu. *muul* (mod. Du. *muul*, early mod. G. *maul*), ON. *mūll* (Sw. *mula*, Da. *mule*). In the later stages of continental Teut. the simple word largely gave place to combs. with explanatory second element: MHG. *mūltier*, mod. G. *maulthier*, Da. *mūltier* (G. *thier*, Da. *dyr*, animal), G. *maulstiel*, Da. *mūltstiel*, *da. mūltstiel*, Sw. *mūltstiel* (G. *esel*, Du. *ezel*, Da. *zsel*, Sw. *äsa*, ass), G. *maulstiel* (*stiel*, horse).

A 14th c. survival of the OE. *mūl* may perh. be found in the isolated form *mūl* in the Göttingen MS. of the *Cursus Mundii*. The obsolete forms *mūl*, *mūl*, represent an Eng. development of OF. *it*, which is found also in other words, as *recueil*, *ois* (= Use).

1. The offspring of a he-ass and a mare. Also popularly applied to the offspring of a she-ass and a stallion (technically called a HINNY).

The mule combines the strength of the horse with the endurance and surefootedness of the ass, and is extensively bred for certain employments for which it is more suited than either; it is ordinarily incapable of procreation. With no good grounds, the mule is a proverbial type of obstinacy.

Multen, *obs. pa. pple. of MELT v.*

1. **Multeous**, *a. Obs. rare*—1. [f. L. *multus*
 many + -EUS. Cf. *multuous*.] Numerous.

1589 WARNER *Alb. Eng.* v. xxv. 112 Yet of more multeous
 Armes we than Scotland were at cost.

2. **Multepi**, **Multer**: see **MULTIPLY**, **MULTURE**.

Multi- (mʊlɪ-), *occas.* before a vowel mult-
 (e.g. *multangular, multarticular, multocular*),
 combining form of L. *multus* much, many. The
 compounds having this prefix in Latin belong for
 the most part to non-classical times: they are
 chiefly of para-synthetic formation, in which multi- =
 'many', as *multangulus* many-angled, *multicaulis*
 many-stalked, *multigenus* of many kinds, but
 a certain number of objective or adverbial com-
 pounds also existed, in which multi- = 'much'; as
multibibus much-drinking, *multicipidus* desiring
 much, *multiscius* knowing much.

In English the compounds of multi- were originally
 either direct adaptations from Latin compounds or
 were modelled upon them, but in the 19th c. the
 prefix came into frequent general use with ppl. adjs.
 and sbs. (Cf. *Poetry*.) The earliest English borrow-
 ings from Latin were *multifary* (Lydgate), *multi-*
farious (Nashe, 1593), *multiformity* (Puttenham,
 1589); they did not become numerous till the
 middle of the 17th c. The more important
 compounds (being chiefly those which have a con-
 tinuous history from the 17th c. onwards) are
 entered as Main words; the present article com-
 prises a typical selection of modern scientific terms
 and of compounds of a general character.

Mun, v. north. and midl. Forms: *Pres. ind. sing. and pl.* 3-*mun*, 3-6 (9 *dial.*) *mon*, *mone*, 6 *monn*, *moun*. *Pres. subj.* 3 *mune*. *Pa. t.* 3 (Ormin) *munnde*, 3-5 *mund(e)*, *mond(e)*, (4 *muond*). See also MAUN. [a. ON. *moun*, *munu* (1st and 3rd sing. *mun*, *munu*, 1st pl. *munnum*, *munnum*; pa. t. *munnda*), a preterite-pres. verb used as an auxiliary of the future tense = shall, will. The prehistoric sense was doubtless 'to intend' (Indo-Germanic root *men-*: *mon-*: *mun-* to think: see MIND sb.); ON. has a slightly differentiated form (inf. *mona*, *munna*) with the sense 'to remember': see MONE v.]

In ON. the pres. sing. has a variant *man*; see MAUN v. In mod. Eng. dialects the pa. t. appears to be represented by *muud*, coincident in form with a frequent unstressed variant of the past tense of *May* v.; the two auxiliaries have therefore partly coalesced in the pa. t.

The combination of *mun* with a negative has various contracted forms, the most frequent being *mun't* (*mōnt*). See E. D. D. s.vv. *Mud*, *Mun*.

An auxiliary verb, followed by inf. without *to*. In mod. dialects equivalent to 'must'; in early use sometimes with the sense 'shall' (pa. t. = 'should', 'would').

It is usually assumed that the existing word is from ON., on the ground that OE. *mirce* should have yielded **mirc*; but it cannot be affirmed that OE. *e* from *kw* would not have remained as (*k*). Cf. *thick*: -OE. *picce*.

The prevailing spelling in Scottish writers is *mirk*; the modern poetic use, being chiefly imitated from *Sc.*, usually has this spelling; the independent use by English writers associates the word with *murky*, whence the form *murk*.]

1. *Mythology*. (Now usually with capital.) One of nine sister-goddesses, the offspring of Zeus and Mnemosyne (Memory), regarded as the inspirers of learning and the arts, esp. of poetry and music.

In Greek antiquity there were other accounts as to the number of the Muses and of their parentage. The names of the nine Muses appear first in Hesiod, who says that Calliope is the chief of them. Later mythologists assigned to each of the Muses a particular class of functions, which, however, are less definitely limited than they appear in modern allusive use, where Clio is the Muse of history, Thalia of comedy, Melpomene of tragedy, Euterpe of music, and Terpsichore of dancing. The other names, Erato, Polyhymnia, Urania, and Calliope, are rarely mentioned in modern literature, as they have no well-known association with any particular branch of art or knowledge. Urania (lit. 'the heavenly'; in formal lists the Muse of astronomy) is invoked by Milton (*P. L.* viii), who explains that he means not the fabled goddess of mythology, but the true celestial source of inspiration.

or referred to as if only one Muse were recognized. Hence often in modern poetic use (cf. 2 a).

Now commonly restricted to the common edible mushroom, *Agaricus campestris*, or to this and species that closely resemble it in general appearance. Some apply *mushroom* to any fungus supposed to be edible, and *toadstool* to any that is believed to be deleterious. Certain botanical writers have used the word as equivalent to **FUNGUS**. The mushroom is a proverbial type of rapid growth.

1. That one of the fine arts which is concerned with the combination of sounds with a view to beauty of form and the expression of emotion; also, the science of the laws or principles (of melody, harmony, rhythm, etc.) by which this art is regulated.

Considered as an art, music has two distinct branches, the art of the composer and that of the executant. The word is often used with special reference to the executive branch, and to instrumental execution rather than vocal; thus, the designation of 'a teacher of music' is usually apprehended to mean one who teaches the art of playing on some instrument.

1. A hand-gun of the kind with which infantry soldiers are armed.

Originally applied to the matchlock, and in the 18th c. still sometimes distinguished from the 'firelock' or 'fusse'. (From earlier examples it appears that arrows as well as bullets were discharged from muskets.) Subsequently it became the general name for the infantry gun, whatever its construction. This use still survives, but as the modern gun is commonly (and in the Army Regulations) called by the specific term *rifle*, there is a tendency to restrict *muskets* to the obsolete forms of the weapon.

Mustachios (musta-fo, mūs-). Pl. **mustachios** (-foz). Forms: a. (from *It. and Sp.*) 6 (mostachii *It. pl.*), **mustachyo**(e), (quasi-Lat. mostachio), 6-7 mustachio, mostachio, 6-9 mustachoo, 7 mustatioe, mustachoo, mostachoo, 7-8 mustachio, 7, 9 mustachio, 8 mustacio, 8-9 mustachioe, 6- mustachio; b. (corrupt forms) 6 moucheacheo, mustachoo, muchache, 6-7 mouchache, 7 mouchachoo; 6 mowohatowe, mutohatoo, mutchado, 6-7 mustachoo, 7 m(o)uchato(e), mushatoo(e), mochatoo, muchate, mus(t)chadode, mochedoo, monchato(e), munchattoe; 8 mouthchato; 8 mouthachio.

[Adopted in 16th c., partly from Sp. *mostacho*, and partly from its source, *It. mostaccio* mostachio, also face, snout, *mostachio* mustache (cf. Albanian *mustakes*, Rumanian *mustat* mustache), a derivative of Gr. *μωστακ- μωσταφ* nasc. (also *βύσταφ*) *mostachic*, a Doric word, commonly believed (notwithstanding the difference both in meaning

and in gender) to be a dialectal variant of *μωσταφ* fem., mouth, jaws.

In the 16-17th c. the word appears in a multitude of corrupt forms due to imperfect apprehension or recollection of the sound. Some of them suggest a pseudo-etymological association with Sp. *muchacho* boy.

In the sing. the word is almost or entirely obsolete, being superseded by **Moustache**; but the plural *mustachios* has considerable currency, sometimes occurring in books that have *mostache* in the singular. With regard to the pronunciation of the first syllable cf. **Moustache**.]

2. Used vocatively. a. Prefixed affectionately to terms of relationship or endearment; also, affectionately or compassionately, or in a jocular or merely familiar tone, to certain designations which are otherwise rarely used vocatively, as in *my man*, *my boy*, *my good fellow*, *my poor man*. (See also *DEAR* d. 1 2 b, c, for the use as prefixed to that adj.)

In modern English it is not (as in some languages) the rule of ordinary speech to prefix *my* to terms of relationship (*father*, *mother*, *brother*, etc.) used vocatively; the use belongs to impassioned literary language. *Son* and *daughter*, however, are exceptions; and the omission of *my* before the vocative *friend* is somewhat arch, or rhetorical.

The lure hung out was, that every Negro, initiated into the myal society, would be invulnerable by the white men. *Ibid.* 417 One of these myal men...gave him a wonderful account of the powerful effects produced by the myal infusion. 1843 *PHILLIPS Jamaica* 249 note, The author once saw a negro suffering from a gum-boil, who persisted in affirming that the Myal Doctor had extracted a snake from the affected part. 1851 G. L. *mysterium*, *a.* Gr. *μυστήριον*, f. **misti-*, root of *μύω* to close (the lips or eyes): cf. *μυστήριον* MYSTERY.

In classical Greek *μυστήριον* occurs chiefly in plural, denoting certain secret religious ceremonies (the most famous being those of Demeter at Eleusis) which were allowed to be witnessed only by the initiated, who were sworn never to disclose their nature. (See sense 9 below.) In the LXX the word occurs only in Daniel and the Apocrypha, where it has the sense of 'secret purpose or counsel' (esp. of a king or of God). This sense is found in the N.T., where the word also means sometimes a religious truth long kept secret, but now revealed through Christ to his Church, and sometimes anything that has a symbolic significance. In later Christian Greek *μυστήριον* became equivalent to *σacramentum* (in several passages the Vulgate renders it by *sacramentum*, even when it means only 'secret'; in other passages *mysterium* is retained). In OF. and English the Christian senses of the word naturally appear earliest.]
